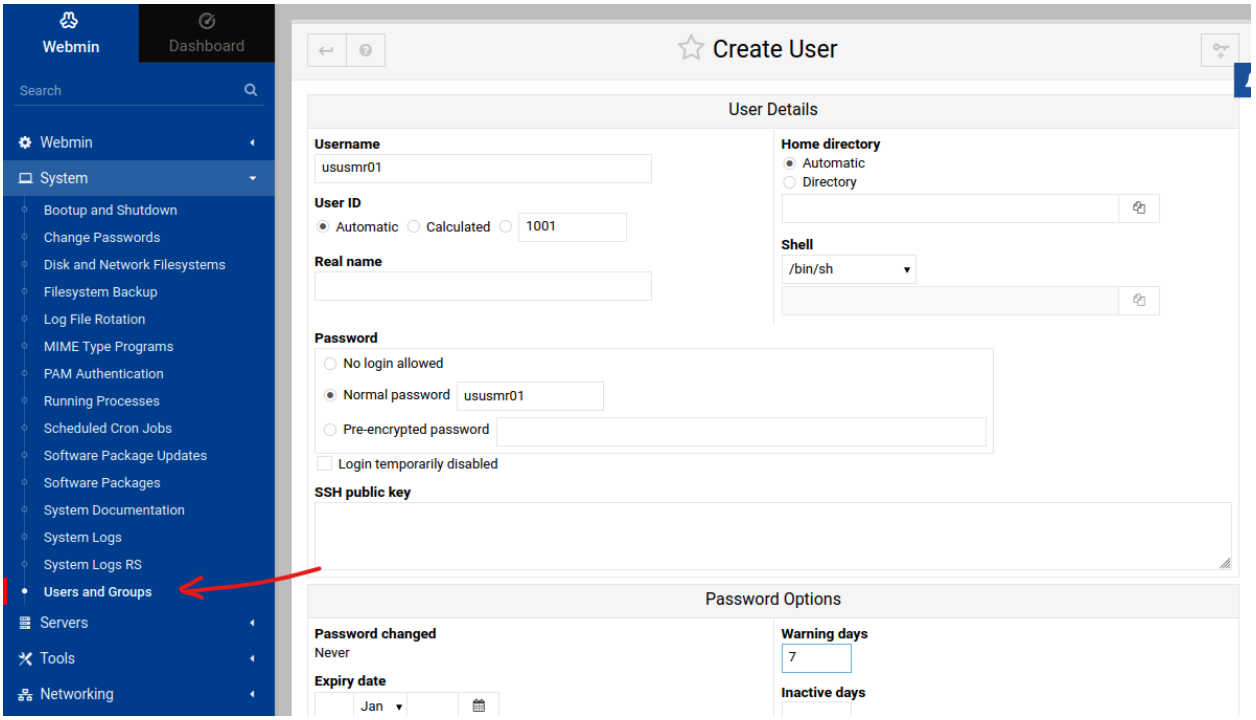
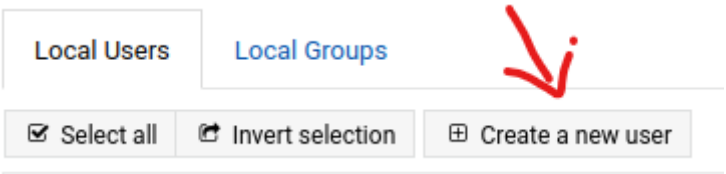
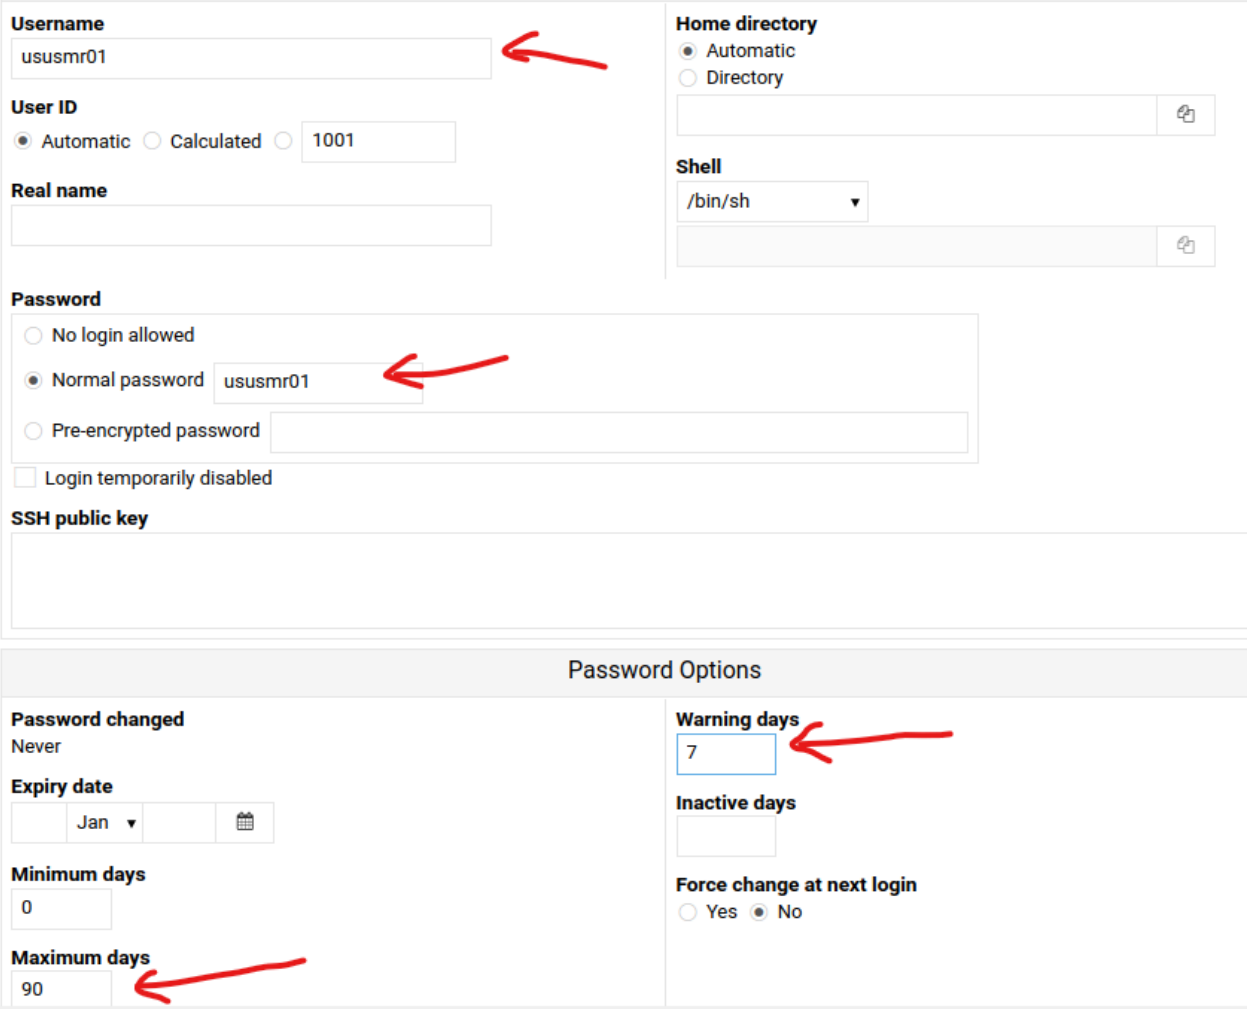
- Crea los usuarios ususmr01 y ususmr02.
- Configúralos para que la contraseña deba cambiarse al menos cada 90 días y avise cuando falte una semana.

En **System - Users and Groups** le damos a **Create a new user** y hacemos todo lo que se nos pide

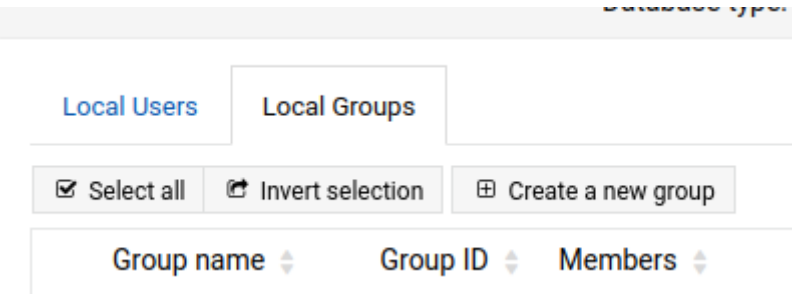




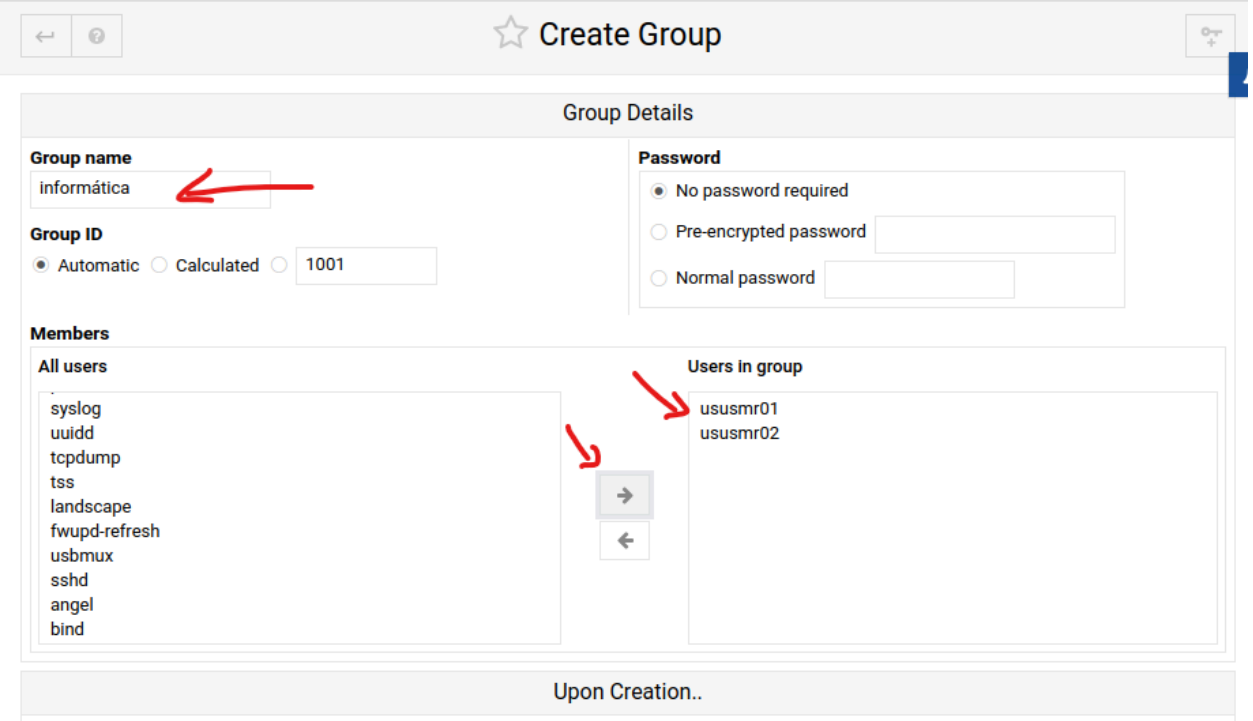


- Crea el grupo informática y añade a los usuarios recién creados.

  En la misma sección de **System - Users and Groups** nos vamos a la pestaña **Local Groups** y luego **Create a new group**

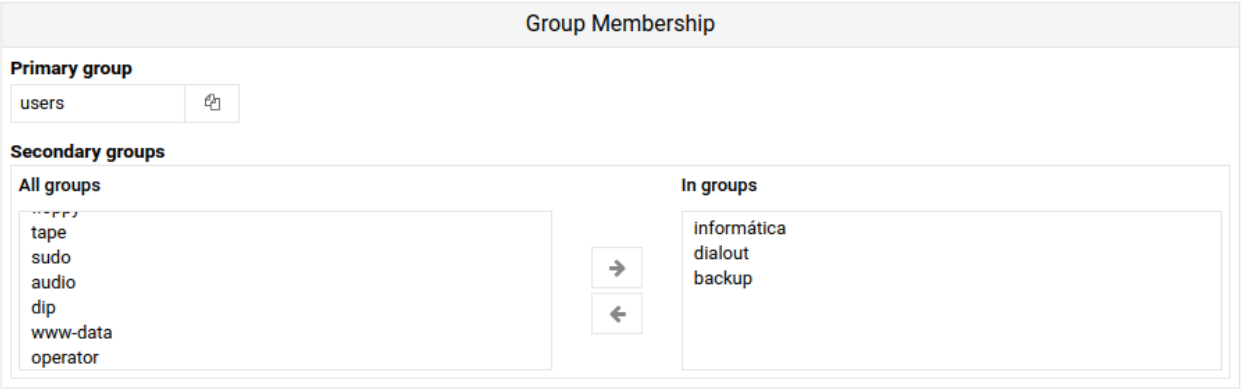


Ahora creamos nuestro grupo **informática** y añadimos los usuarios recien creados.

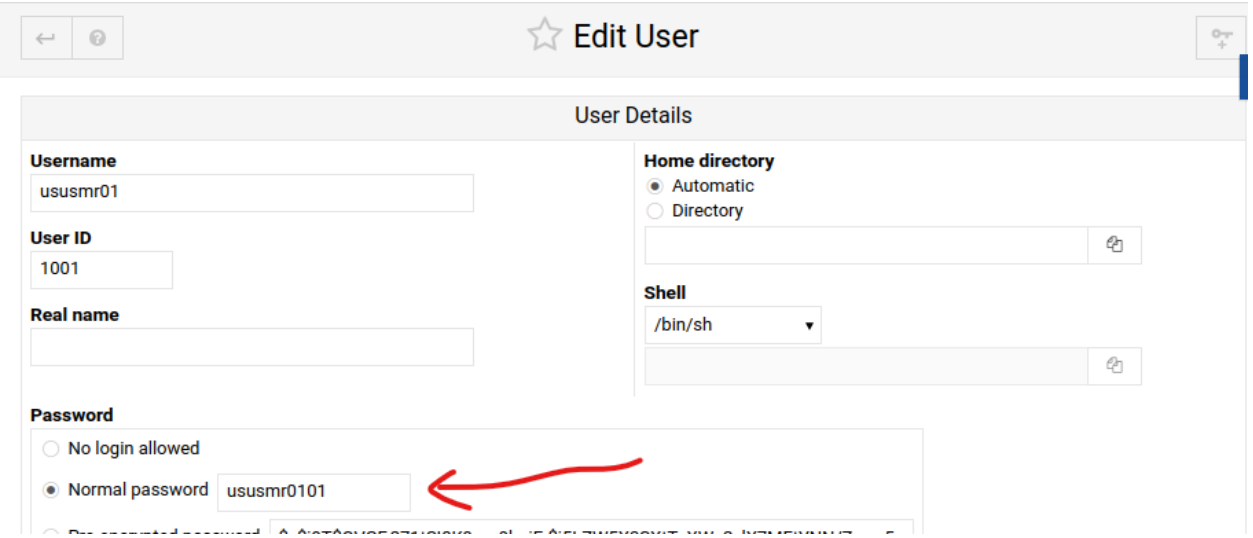


- Añade los dos usuarios recién creados al grupo dialout y backup.

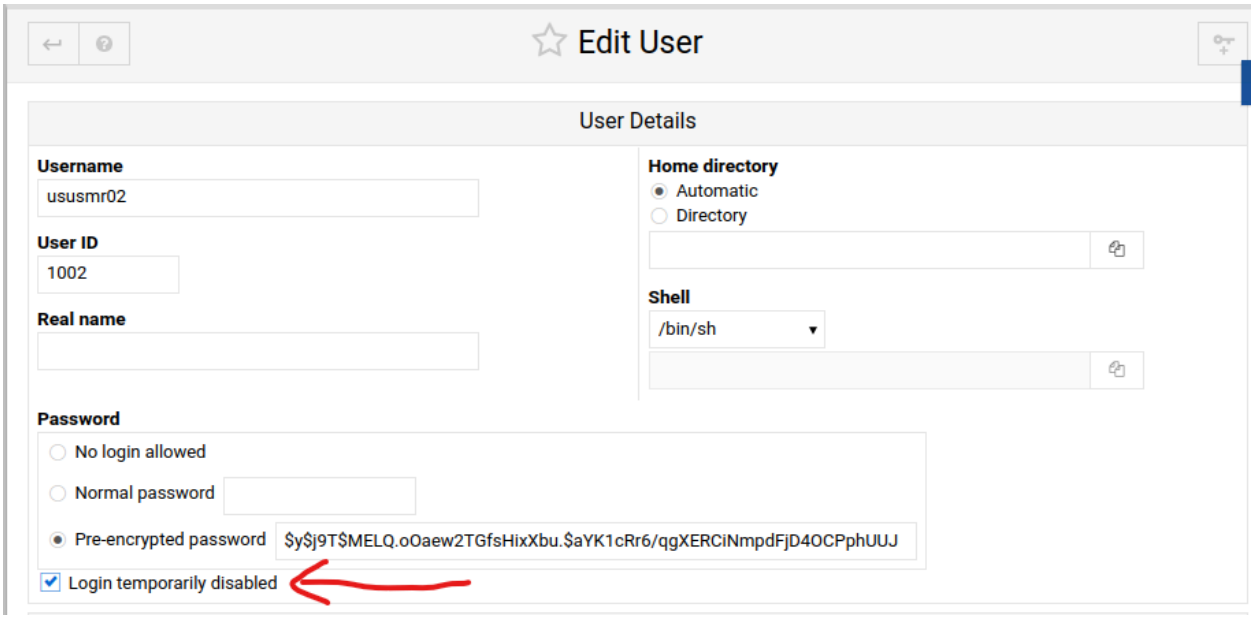
  Desde la ventana de configuración del usuario en **System - Users and Groups** lo metemos en los grupos.



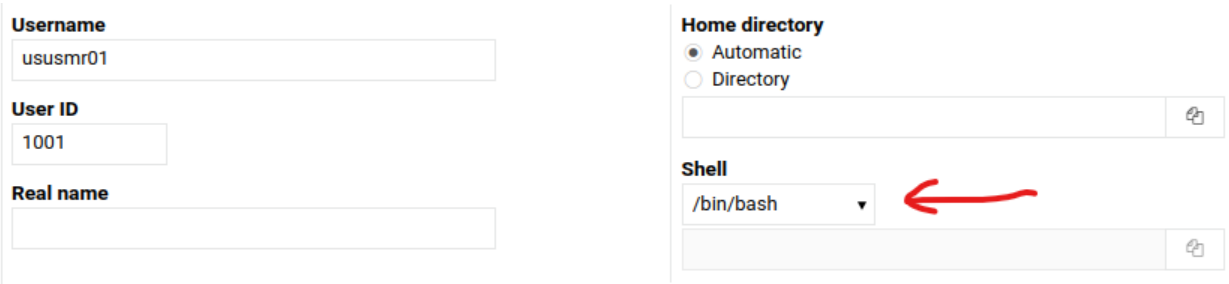
- Cambia la contraseña del usuario ususmr01.

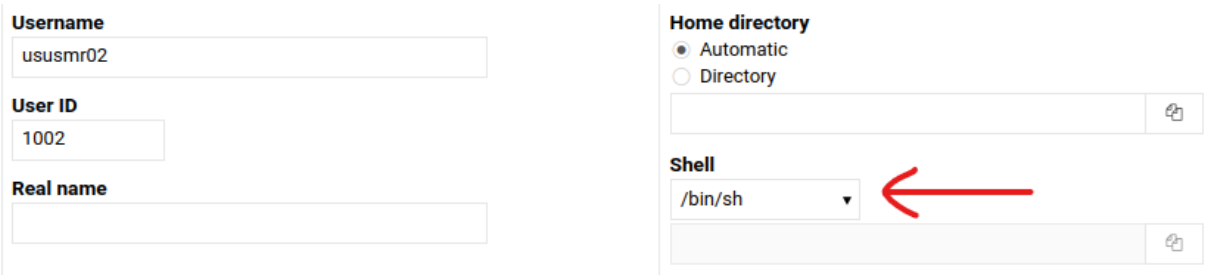


- Desactiva el usuario ususmr02.



- Cambia la shell del usuario ususmr01 para que sea **bash** y la de ususmr02 para que sea **sh**.





- Inicia sesión con el usuario ususmr01 a través de ssh y posteriormente con ususmr02. ¿qué pasa?.

```
cliente@cliente:~$ ssh ususmr01@servidor
ususmr01@servidor's password:
Welcome to Ubuntu 24.04.1 LTS (GNU/Linux 6.8.0-51-generic x86_64)

 * Documentation:  https://help.ubuntu.com
 * Management:     https://landscape.canonical.com
 * Support:        https://ubuntu.com/pro

 System information as of mar 28 ene 2025 19:34:23 UTC

  System load:  0.11               Processes:               134
  Usage of /:   45.6% of 11.21GB   Users logged in:         1
  Memory usage: 18%                IPv4 address for enp0s3: 192.168.1.100
  Swap usage:   0%                 IPv4 address for enp0s3: 192.168.1.4
```

```
ususmr01@servidor:~$
```

```
cliente@cliente:~$ ssh ususmr02@servidor
ususmr02@servidor's password:
Permission denied, please try again.
ususmr02@servidor's password:
Permission denied, please try again.
ususmr02@servidor's password:
ususmr02@servidor: Permission denied (publickey,password).
```

Que con **ususmr01** podemos conectar sin problemas y con **ususmr02** no nos deja porque lo hemos deshabilitado previamente.

- Muestra los inicios de sesión desde Webmin, del usuario ususmr01 y ususrm02.

  Para ello nos vamos a **System - System Logs** y filtramos usando los usuarios
